## Patente

**Baseline-ZERO™** DNase is covered by patent applications of Epicentre® (an Illumina® company). Purchase of this product is accompanied by a limited, nonexclusive license for the purchaser to use the purchased product solely for life science research. Contact Epicentre® (an Illumina® company) for information on licenses for uses in diagnostics or other fields.

Use of **Betaine in DNA Polymerase Reactions**, including, but not limited to use for PCR or DNA sequencing, is covered by U.S. Patent No. 6,270,962, European Patent No. 0742838, German Patent No. DE4411588C1, and other patents or patent applications in the U.S. and other countries that are either assigned or exclusively licensed to Epicentre. Purchase of a product from Epicentre that contains betaine and a thermostable DNA polymerase is accompanied by a limited nonexclusive license for the purchaser to use the purchased product solely for life science research, whether the purchaser performs research in a not-for-profit or a for-profit organization. However, if the product does not contain a thermostable DNA polymerase in addition to betaine, all for-profit organizations require a license from Epicentre in order to use betaine or a product that contains betaine in DNA polymerase reactions for research applications, and not-for-profit organizations require a license if the product, the research, or the result of the research is transferred to or obtained for or on behalf of a for-profit organization. Licenses are also available to use of betaine in DNA polymerase reactions for human or animal diagnostics, screening, or other fields of use. Please contact Epicentre® (an Illumina® company) for information related to such licenses

**Circligase™ ssDNA Ligase** is covered by intellectual property rights licensed to Epicentre® (an Illumina® company). The purchase of this product conveys to the buyer the nontransferable right to use the purchased product and components of the product in research conducted by the buyer. The buyer cannot sell or otherwise transfer this product or its components to a third party and in particular, no rights are conveyed to the buyer to use the product or its components for commercial use purpose other than for research to gain information that is used by the buyer.

**CopyControl™** and **CopyCutter™** Products are covered by U.S. Patent No. 5,874,259 licensed to Epicentre® (an Illumina® company) and by U.S. Patent No. 7,138,267 for specific CopyControl cell lines. By purchasing CopyControl systems or vectors, the purchaser receives the right to use the product purchased from Lucigen or clones obtained therefrom solely for life science research. Purchase of these products does not grant rights to: (1) offer products, components of products, or any derivatives thereof for resale; or (2) to distribute or transfer the products, components of products, or derivatives thereof to third parties

**EZ-Tn5™ Transposon Tools** for in vitro transposon insertion are covered by U.S. Patent Nos. 5,925,545; 5,948,622; 5,965,443, and 6,437,109; and other patents issued or pending, exclusively licensed or assigned to Epicentre® (an Illumina® company). These products are accompanied by a limited nonexclusive license for the purchaser to use the purchased product(s) solely for in vitro transposon insertion for life science research. Purchase of these products does not grant rights to: (1) offer products, components of products, or any derivatives thereof for resale; or (2) to distribute or transfer the products, components of products, or any derivatives thereof to third parties. Contact Epicentre® (an Illumina® company) for information on licenses for uses other than life science research.

**FailSafe Enzyme Mix; FailSafe PCR Premix Selection Kits; and the FailSafe PCR System** and certain methods of their use are covered by one or more of U.S. Patents 5,556,772; 7,297,519; and 7,312,052, which are licensed to Epicentre® (an Illumina® company) by Agilent Technologies, Inc. Purchasers of these products are granted the right to use the products and to practice the patented methods with the products in all fields outside the human diagnostic field, i.e. in vitro measurement, observation, and/or determination of attributes, characteristics, diseases, traits, and/or other condition of a human being for the medical management of that human being.

**MasterAmp™ Extra-Long PCR Kit** is licensed by Epicentre® (an Illumina® company) under patent claims outside the U.S. corresponding to the expired U.S. Patent Number 5,436,149, owned by Takara Bio Inc.

**RNA 5' Polyphosphatase** is covered by patent applications of Epicentre® (an Illumina® company). Purchase of this product is accompanied by a limited, nonexclusive license for the purchaser to use the purchased product solely for life science research. Contact Epicentre® (an Illumina® company) for information on licenses for uses in diagnostics or other fields.

Use of **Transposome™** Complexes for in vivo Transposon Insertion, including, but not limited to **EZ-Tn5™ Transposome™** complexes, is covered by U.S. Patent Nos. 6,159,736, and 6,294,385; European Patent No. 1115856 and other patents issued or pending, exclusively licensed to Epicentre® (an Illumina® company). These products are accompanied by a limited nonexclusive license for nonprofit organizations to use the purchased products solely for life science research. Specifically, researchers at nonprofit organizations may use these products in their research and they may transfer derivatives of the products to colleagues at other nonprofit organizations provided that such colleagues agree in writing to be bound by the terms and conditions of this label license. Researchers may not transfer these products or its derivatives to researchers at other organizations that are not nonprofit organizations without the express written consent of Epicentre® (an Illumina® company) and without those entities having an express license from Epicentre® (an Illumina® company) for the use of the products. Other than as specifically provided here, an authorized transferee of these products shall have no right to transfer these products or its derivatives to any other person or entity. A

nonprofit organization performing research using this product for a for-profit organization shall also be considered for-profit. For-profit entities purchasing these products shall have three (3) months to evaluate the products in their research. Thereafter, such for-profit entities shall either contact Epicentre® (an Illumina® company) and take a license for their continued use of the products or destroy the products and all derivatives thereof. Please contact Epicentre® (an Illumina® company) with respect to licenses for commercial use, including manufacturing, therapeutic, or diagnostic use.
