Digital display and control

Unique *COMBI*-Rotor

The unique rotor design of the **MyFuge 12 Plus** eliminates the need to switch rotors (or use a separate centrifuge) when spinning both microtubes and PCR strips. The included, COMBI-Rotor allows for simultaneous centrifugation of up to 12 microtubes and/or 4 PCR strips.

In addition, the MyFuge 12 Plus features a large digital display with adjustable speed (up to 7,000 rpm) and a digital timer. With built in rcf conversion, speed can be set/displayed in rpm or rcf.

The MyFuge 12 Plus combines power with intuitive functionality making it the perfect companion in any laboratory.
