A.:** Acura, Calibra, Socorex. **SONY Corporation:** KIRAVIA Blue 520. **Sorenson BioScience, Inc:** e-dek, OneTouch. **Stratagene Corp.:** MX3000P, MX3005P, MX4000P, Stratagene, RoboCycler. **Tecan Group Ltd., Switzerland:** Aquarius, Cavo, Freedom EVO, Genesis, Tecan, Te-MO. **Techne Inc., USA:** Techne, Touchgene. **Thermo Fisher Scientific, Inc. and its subsidiaries:** ABgene, ABI, Alexa Fluor, CapEase, ClipTip, DeepWell, DuraSeal, DyLight, DyNAmo, DyNAzyme, Finnpiptette, KingFisher Flex, KingFisher 96 Flex, LIVE/DEAD, Pacific Orange, Nunc, Phusion, SYTOX, Template Generation System. **Twitter, Inc.:** Twitter Logo. **U.S. Safety:** Matrix. **Ziath Ltd.:** DataPaq, Ziath. **Zymark Corp.:** Presto, Zymark. **3M GmbH:** 3M.

Patente

Baseline-ZERO™ DNase is covered by patent applications of Epicentre® (an Illumina® company). Purchase of this product is accompanied by a limited, nonexclusive license for the purchaser to use the purchased product solely for life science research. Contact Epicentre® (an Illumina® company) for information on licenses for uses in diagnostics or other fields.

Use of **Betaine in DNA Polymerase Reactions**, including, but not limited to use for PCR or DNA sequencing, is covered by U.S. Patent No. 6,270,962, European Patent No. 0742838, and German Patent No. DE4411588C1, and other patents or patent applications in the U.S. and other countries that are either assigned or exclusively licensed to Epicentre. Purchase of a product from Epicentre that contains betaine and a thermostable DNA polymerase is accompanied by a limited nonexclusive license for the purchaser to use the purchased product solely for life science research, whether the purchaser performs research in a not-for-profit or a for-profit organization. However, if the product does not contain a thermostable DNA polymerase in addition to betaine, all for-profit organizations require a license from Epicentre in order to use betaine or a product that contains betaine in DNA polymerase reactions for research applications, and not-for-profit organizations require a license if the product, the research, or the result of the research is transferred to or obtained for or on behalf of a for-profit organization. Licenses are also available to use of betaine in DNA polymerase reactions for human or animal diagnostics, screening, or other fields of use. Please contact Epicentre® (an Illumina® company) for information related to such licenses

CircLigase™ ssDNA Ligase is covered by intellectual property rights licensed to Epicentre® (an Illumina® company). The purchase of this product conveys to the buyer the non-transferable right to use the purchased product and components of the product in research conducted by the buyer. The buyer cannot sell or otherwise transfer this product or its components to a third party and in particular, no rights are conveyed to the buyer to use the product or its components for commercial use purpose other than for research to gain information that is used by the buyer.

CopyControl™ and **CopyCutter™** Products are covered by U.S. Patent No. 5,874,259 licensed to Epicentre® (an Illumina® company) and by U.S. Patent No. 7,138,267 for specific CopyControl cell lines. By purchasing CopyControl systems or vectors, the purchaser receives the right to use the product purchased from Lucigen or clones obtained therefrom solely for life science research. Purchase of these products does not grant rights to: (1) offer products, components of products, or any derivatives thereof for resale; or (2) to distribute or transfer the products, components of products, or derivatives thereof to third parties

EZ-Tn5™ Transposon Tools for in vitro transposon insertion are covered by U.S. Patent Nos. 5,925,545; 5,948,622; 5,965,443, and 6,437,109; and other patents issued or pending, exclusively licensed or assigned to Epicentre® (an Illumina® company). These products are accompanied by a limited nonexclusive license for the purchaser to use the purchased product(s) solely for in vitro transposon insertion for life science research. Purchase of these products does not grant rights to: (1) offer products, components of products, or any derivatives thereof for resale; or (2) to distribute or transfer the products, components of products, or any derivatives thereof to third parties. Contact Epicentre® (an Illumina® company) for information on licenses for uses other than life science research.

FailSafe Enzyme Mix; FailSafe PCR Premix Selection Kits; and the FailSafe PCR System and certain methods of their use are covered by one or more of U.S. Patents 5,556,772; 7,297,519; and 7,312,052, which are licensed to Epicentre® (an Illumina® company) by Agilent Technologies, Inc. Purchasers of these products are granted the right to use the products and to practice the patented methods with the products in all fields outside the human diagnostic field, i.e. in vitro measurement, observation, and/or determination of attributes, characteristics, diseases, traits, and/or other condition of a human being for the medical management of that human being.

MasterAmp™ Extra-Long PCR Kit is licensed by Epicentre® (an Illumina® company) under patent claims outside the U.S. corresponding to the expired U.S. Patent Number 5,436,149, owned by Takara Bio Inc.

RNA 5' Polyphosphatase is covered by patent applications of Epicentre® (an Illumina® company). Purchase of this product is accompanied by a limited, nonexclusive license for the purchaser to use the purchased product solely for life science research. Contact Epicentre® (an Illumina® company) for information on licenses for uses in diagnostics or other fields.

Use of **Transposome™** Complexes for in vivo Transposon Insertion, including, but not limited to **EZ-Tn5™ Transposome™** complexes, is covered by U.S. Patent Nos. 6,159,736, and 6,294,385; European Patent No. 1115856 and other patents issued or pending, exclusively licensed to Epicentre® (an Illumina® company). These products are accompanied by a limited nonexclusive license for non-profit organizations to use the purchased products solely for life science research. Specifically, researchers at non-profit organizations may use these products in their research and they may transfer derivatives of the products to colleagues at other non-profit organizations provided that such colleagues agree in writing to be bound by the terms and conditions of this label license. Researchers may not transfer these products or its derivatives to researchers at other organizations that are not non-profit organizations without the express written consent of Epicentre® (an Illumina® company) and without those entities having an express license from Epicentre® (an Illumina® company) for the use of the products. Other than as specifically provided here, an authorized transferee of these products shall have no right to transfer these products or its derivatives to any other person or entity. A non-profit organization performing research using this product for a for-profit organization shall also be considered for-profit. For-profit entities purchasing these products shall have three (3) months to evaluate the products in their research. Thereafter, such for-profit entities shall either contact Epicentre® (an Illumina® company) and take a license for their continued use of the products or destroy the products and all derivatives thereof. Please contact Epicentre® (an Illumina® company) with respect to licenses for commercial use, including manufacturing, therapeutic, or diagnostic use.

Allophycocyanin (APC) conjugates: US Patent No. 5,714,386

Carbocyanin (Cy): US Patent Numbers 4,981,977, 5,268,486 and other patents pending.

R-Phycoerythrin (R-PE) and Allophycocyanin (APC): US Patent Nos. 4,542,104 and 5,714,386

PE-Cy7: US Patent Number 4,542,104

APC-Cy7: US Patent Number 5,714,386

Peridinin chlorophyll protein (PerCP): US Patent No. 4,876,190

CD44: US Patent No. 5,108,904

CD62P: US Patent No. 4,783,330

Antibodies to Human FcRL6 (clone 2H3): US Patent Numbers 7,317,087 and 8,648,171

Antibody to Human Fusin (clone 12G5): US Patent No. 5,994,515

12G5: US Patent Number 5,994,515

Antibodies to Human IL-4: US Patent Number 5,041,381

Antibodies to Human and Murine IL-10: US Patent Number 6,239,260

Antibodies to vIL-10: US Patent Number 5,756,342

Antibodies to Human and Murine IL-10 Receptor: US Patent Number 5,863,796

Antibodies to Human and Murine IL-17: US Patent Number 6,274,711

Antibodies to Human CD338 (Clone 5D3): US Patent Nos. 6,313,277; 7,541,437; 7,655,755; 7,741,455

Antibodies to Human GM-CSF: US Patent Number 5,070,013

Antibodies to Human and Murine SLAM: US Patent Number 5,576,423

Antibodies to Human and Murine VEGFR-3 (Clone 9D9F9): US Patent Number 6,107,046, EP Patent Number 807124, JP Patent Number 4841724, JP Patent Number 3723210, CA Patent Number 2192235, AU Patent Number 694524

Antibodies to ATM Phospho (Ser1981): US Patent Number 7,108,992

Recombinant Human TGF- β 1 (carrier-free): U.S. Patent No. 5,104,977, issued April 14, 1992 entitled "Purified Transforming Growth Factor Beta", U.S. Patent No. 10/585,499, filed July 6, 2006 entitled "Composition and Methods for The High Efficiency Expression of the Transforming Growth Factor-Beta Supergene Family"

Antibodies to Mouse IL-6 Receptor, Mouse IL-9, Human IL-9: US Patent No. 5,157,112; European Patent No. 0361284 Antibodies to Human IL-9 Receptor: US Patent No. 5,962,269; European Patent No. 0643719

Antibodies to MART-1 (clones M2-9E3 and M2-7C10): US 5,874,560

Antibodies to RNA Polymerase II (clones H5 and H14): US 6,090,784
