

**Biozym dNTP Mix**  
**25 mM each (100 mM total)**

Catalog # 331550  
2 x 0.5 ml

Store at -20°C

**Description**

Biozym dNTP Mix contains aqueous solution of ultra-pure dATP, dGTP, dCTP and dTTP, each nucleotide at a final concentration of 25 mM.

Biozym dNTP Mix is stable during multiple freeze-thaw cycles. After 5 weeks at room temperature 95% of dNTPs remain in triphosphate form.

**Storage**

Store at -20°C

**Biozym Scientific GmbH**

Steinbrinksweg 27  
D-31840 Hess. Oldendorf  
Ph: +49 5152 9020

**Applications**

For direct use in many applications including PCR, high-fidelity PCR, long PCR, fast PCR, real-time PCR, primer extension, cDNA synthesis, MDA, RDA and DNA labeling/sequencing.

**Technical support**

For technical support please contact [support@biozym.com](mailto:support@biozym.com)

**Product use limitations**

This product is developed and sold exclusively for research purpose and *in vitro* use only.
